Project Experience

Bug Bounty | March 2024 - Current

Advise of security best practices during development

- Conducting vulnerability testing on web applications through public and private bug bounty programs
- Submitting detailed reports on found vulnerabilities
- 10+ vulnerabilities reported
- 96% accuracy

Recon Automation | September 2024 - Current

- Developing a suite of open source reconnaissance tools for use in larger automation scripts
- Releasing research related to the development of these scripts
- Using Bash and Python for scripts, also using linux utilities for data normalization

SIEM Deployment | August 2024 - Current

- Researching SIEM software options
- Deploying SIEM stack capable of monitoring 100+ endpoints
- Gaining familiarity with Elasticsearch and network monitoring tools
- Configuring custom log ingestion

HacktheBox | July 2022 - Current

- Practicing Penetration techniques in a realistic environment using provided labs
- Most Recently Participated in Cyber Apocalypse 2024

Certification

CompTIA CySA+ | Valid: February 2023 - February 2026

TestOut Network Pro | Obtained May 2019 | Does not expire

TestOut PC Pro | Obtained May 2018 | Does not expire
